

UTAH'S STATE FAIR TO HAVE GREAT FISH EXHIBIT

AQUATIC DISPLAY BY THE GOVERNMENT INTERESTING.

Bureau of Fisheries of the Department of Commerce Proposes Showing to What Extent Country's Meat Supply Can Be Relieved By Use of the Delectable of the Deep As Food.

Fish with which most Americans have no more than a passing acquaintance will be emphasized as important sources of food in the combined government exhibits at the Utah State fair. The aquatic display is being set out by the bureau of fisheries of the United States department of commerce, which, through its eat more fish campaign, is showing to what extent the demand on the country's meat supply can be relieved by the use of the dwellers in the deep. While and shark meat, already shown to be palatable and worth eating, will figure in the displays. On the Pacific Coast the consumption of whale meat practically equals the supply. Shark meat was demonstrated recently at a New York City food show and met with instant favor.

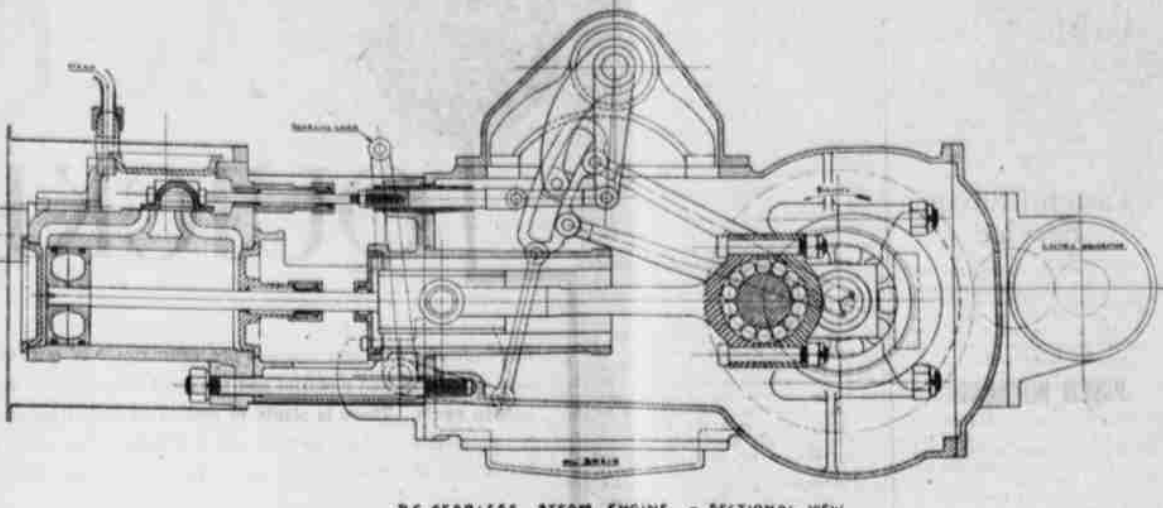

Sharks and whales are big, and their names are striking, but smaller members of the fish family will have full attention in the exhibit. Among them are the tilapia, the spiny dogfish, the grayfish, the "black cod" or scabbard, the burbot, herring, whiting, codfish, carp, drumfish and redfish, the greater and more general use of which is urged. In the markets where these products were already known their consumption has been increased, and in other fields new markets have been created. Circulars descriptive of these and other marine species will be displayed. Each species has many recipes for the cooking of fish. These will be sent free upon request to the United States bureau of fisheries, Washington, D. C.

Specimens of the tanned skins of sharks and other fishes, selected at random, but showing the variety of the natural leather and the finish to which it is susceptible, will be displayed. Because of increasing scarcity of the hides of mammals, and with the expected production of fish leather, comparable with other leathers, notable results are expected in this field. The bureau of fisheries also will display a map showing the localities of its field stations. Biological laboratories are located at Woods Hole, Mass., Beaufort, N. C., Key West, Fla., and Fairport, La., where, in addition to the regular staff, some of the leading scientists of the country are employed, principally during the summer months, in investigating fishery problems. During the year 1917 the bureau operated fifty-five regularly established hatcheries and seventy-four egg collecting stations. Fifty species of fish and the lobster were handled, and a total of more than five billion fish (larval fish) and eggs were distributed.

The fresh water pearl button industry will receive attention in a display of the principal varieties of mussel shells used, the tools employed and the unfinished and finished buttons. This industry, now employing approximately twenty thousand men, had an output in 1914 valued at \$4,379,514, compared to \$1,174,285 in 1900.

R.C. GEARLESS STEAM ENGINE - SECTIONAL VIEW

The above cut shows the wonderful engine of the Peterson-Culp Gearless Steam Auto. This engine is the "main spring" of the "supersteamer" and pushes the car along without the least bit of noise or grief or strain from a small pace to a speed of sixty miles an hour.

This is the wonderful invention that

did away with the differential and with any and all gears that are absolutely indispensable on other automobiles. The company is turning out a new catalogue with various photographs which will be sent to interested parties upon request from the Price office.

The stockholders will be pleased to

learn that the company is reorganized with its distribution of stock strongly in favor of stockholders. The promoters have returned 300,000 shares to the treasury, which now is 300,000 shares strong, holding the control by a majority of 300,000 shares over the outstanding stock amounting to 500,000 shares.

Mr. John H. Redd, secretary of the company, has just reported from Denver, Colo., where this transaction was made at the office of the company's attorney. Mr. Redd reports that the people in Colorado show a strong interest in the car and according to his statement the prospects are very encouraging.

CLOSE TO THIRTEEN MILLION MEN FOR ARMY

WASHINGTON, D. C., Aug. 31.—All men from 18 to 45 years old in the continental United States, except those in the army or navy or already registered, were summoned by President Wilson today to register for military service on Thursday, September 12th. Machinery of the provost marshal general's office was set in motion to carry out the second great enrollment under a presidential proclamation issued soon after the president had signed the new manpower act extending the draft ages. The bill, completed in congress yesterday, had been sent to the White House for the president's signature today soon after the house and senate convened. It is estimated that at least 12,750,000 men will enroll, compared with nearly ten million at the first registration June 5, 1917. Of those it is estimated that 2,500,000 will be called for general military service, probably two-thirds of the number coming from the 1,500,000 or more between the ages of 18 and 21 years.

General March has said all registrants called into the army will be in France before next June 26th, swelling the American expeditionary force to more than the four million men expected to win the war in 1918. The last to be called will be the youths in their eighteenth year, but those of that age who desire and who have the necessary qualifications may be inducted into service on October 1st for special technical or vocational training. Registration will be conducted by the local draft boards. All federal, state, county and municipal officers are called upon to aid the boards in their work, to preserve order and to round up slackers. All registrants will be classified as quickly as possible under the questionnaire system, and a drawing will be held at the capitol to fix the order of registrants in their respective classes.

The provost marshal general's estimate today places the number of men under 21 years in the army at about 245,000, and the number of those from 22 to 45 years at 165,000.

GOOD FOR BILIOUSNESS.

Two years ago I suffered from frequent attacks of stomach trouble and biliousness. Seeing Chamberlain's Tablets advertised I concluded to try them. I improved rapidly. —Miss Emma Verbyke, Lima, O.—Adv.

France may claim the happiest marriages in the world, but the happiest divorces in the world are made in America.

Proper Food Produces Endurance

And endurance produces success. Success depends greatly on human health. Wholesome food not only establishes health, but it maintains vitality essential to daily work.

Our Meats and Meat Products

Are selected according to the above. They are wholesome, kept cleanly, and represent the standard manufacturers. When you eat, treat yourself.

CARBON COUNTY COMMISSION CO.

A. W. SHINEK, Manager.

Guard Your Health!

Good health is impossible in a home where the plumbing is defective. If you are building make sure your plumbing is expertly installed. It isn't even a good gambler's chance if you do otherwise.

Repairs now will protect you against danger in disease later, as well as annoyance when defects, due to severe winter use, show up suddenly at some inopportune time.

RED CROSS FOREIGN SERVICE

Mrs. Caroline Gilmore, Secretary, Receives Instructions.

Mrs. Caroline Gilmore, secretary of the Carbon County Chapter of the American Red Cross at Price, has received word from Denver, Colo., headquarters that the organization cannot enroll for foreign service any woman having a father, husband or son in the armed service of the United States, either in this country, Canada or abroad, or in overseas service of the Red Cross, the Young Men's Christian association or organizations of a similar nature.

Applications of women with German or Austrian name, or of recent German or Austrian antecedents are accepted, but with reluctance, owing to the difficulties which arise in connection with passports, both here and throughout their service abroad. Passport will not be issued to a woman under 25 years of age.

All applicants, when paid by the Red Cross, must enroll for one year's service. Full volunteers must enroll for six months. Mrs. Gilmore says that so far there have been six applicants at Price and throughout Carbon county for this service, but she is confident that five out of the six will be refused because of disqualifications cited above. In filing application all candidates must give as references the names of people knowing their qualifications for this service. One reference must be a woman. Also send in three additional names of people who have known you from eight to ten years.

Before final acceptance, the applicant must undergo a physical examination by an authorized Red Cross physician, as the Red Cross cannot send abroad anyone who is not physically capable of carrying on the work assigned to them. The expense of this examination is borne by the Red Cross.

WARNING HAS GONE FORTH CONCERNING THE WILDCATS

Exploitation of the public to promote new company organizations whose business legitimacy is regarded as of doubtful if not totally valueless character, is placed under the positive ban of the state council of defense in a warning issued by H. H. Farnsworth, its president. The caution against purchase of stock in those enterprises, some of which are said to be worthless, is given to the public generally through the county council of defense and follows the issuance of a letter of warning by T. N. Taylor of Provo, president of the Utah state banking association, to members of that organization Taylor having particularly designated mining and oil enterprises in his warning letter, the state council of defense names other schemes in which the financial aid of the public is sought. There is announced by the state council no wish to reflect upon legitimate enterprises, but emphatic disapproval is pronounced upon purchase of stock in any business whose legitimacy and dependability are not first competently established as producers of war necessities.

That good printing. The Sun.

CASTLE GATE YOUNG MAN BECOMES JUDGE ADVOCATE

Another Carbon county boy in the person of Lieut. G. Bentley Woolley is making good with his Uncle Sam. He is the son of Mr. and Mrs. R. B. Woolley of Castle Gate and has been in command of the destroyer, Druid, for the past three months. Word that Lieutenant Woolley has been relieved of his command to assume shore duty as a judge advocate has just been received by his parents. Relief from duty on sea was necessitated because of illness. It is expected that the lieutenant will be soon assigned to his command again. The destroyer, Druid, has been in European waters for the past three months. Lieutenant Woolley graduated from Annapolis in June, 1917, and has been in active service every day since. He made an unusual record in the naval academy. He graduated from the Salt Lake City high school in 1914.

MUCH MAIL MAY BE LOST THROUGH THE SUBMARINES

If your son, sweetheart or brother with the United States army in Europe fails to receive your letters, this item may provide the explanation. News was received a few days ago that two steamers, carrying many sacks of mail, were submarine victims. The vessels were the United States steamship President Lincoln, with six sacks of letters and one pouch of registered mail, all of which was posted between May 27th and 30th, and the United States steamship Napoli, which had on board a thousand letters, one hundred and fourteen registered letters and thirteen thousand seven hundred and seventy parcel post packages. Most of this mail was consigned to Genoa and Naples, Italy. Seven sacks of mail from Shanghai also were lost.

UTAH MEN ARE TO SERVE AFTER PATIENT WAITING

After patient months of waiting, the more than two thousand United States men in Utah at last may be pressed into service, though their new duties will not offer the thrills experienced by the physically fit. Instructions received but recently, asking Utah draft boards to make a survey of such men capable of giving clerical aid in draft offices, is interpreted as meaning the elimination of girls from draft board offices. They probably will supplant nearly sixty male and female employees of Utah draft boards and may replace able-bodied men serving on draft boards.

WITHDRAWAL OF PAPERS IS BAR AGAINST CITIZENSHIP

According to information in the hands of the Carbon county exemption board any citizen or subject of a country neutral in the present war who has declared his intention to become a citizen of the United States and has not completed his citizenship shall be relieved from liability to military service upon making an affidavit withdrawing his intention to become a citizen of the United States, which affidavit shall operate and be held to cancel his declaration of intention to become a citizen of the United States and shall forever debar him from becoming a citizen of the United States.

YOUNG ALBERTSON WRITES TO CASTLE GATE FOLKS

"Just a few lines to tell you that I am well and a little bit about our Fourth of July celebration in France," writes Albert Albertson to relatives at Castle Gate. Continuing he says: "While the parade and review were going on several aeroplanes of different types were flying to and fro over the huge crowd. It was great, and somewhat new to a lot of us. I believe it stirred the patriotism of everyone and made the French and Americans feel nearer to each other. I am quite sure that it made every American soldier and sailor feel glad he is over here trying to do his bit."

FOR A WEAK STOMACH.

The great relief afforded by Chamberlain's Tablets in a multitude of cases has fully proven the great value of this preparation for a weak stomach and impaired digestion. In many cases this relief has become permanent and the sufferers have been completely restored to health.—Adv.

WHEAT PRICE IS FIXED FOR THE COMING YEAR

TWO DOLLARS THE BUSHEL FOR UTAH AND IDAHO.

Considerable National Risk, Says President Wilson, In Obliging the Country in Advance—Possibility of Peace Before Next Crop Is Harvested Has Much Bearing on Action.

WASHINGTON, D. C., Sept. 2.—By proclamation issued today President Wilson set \$2.20 a bushel as the minimum price guaranteed by the government for the 1919 wheat crop. A disinterested commission, the president stated, will be appointed next spring to see whether the increased cost of farm labor and supplies would justify an increase above that price. Possibility of peace before the middle of 1920 is indicated in a memorandum written by the president and accompanying the proclamation as a factor in determination of the price to be maintained in the present price for the 1919 crop.

"In giving a guaranteed price for wheat one year in advance (the only industry guaranteed by the government), there is involved a considerable national risk," the president said. "If there should be peace or increased shipping available before the middle of 1920, Europe will naturally supply itself from the large stores of much cheaper wheat now in the southern hemisphere, and therefore the government is undertaking a risk which might in such an event result in a national loss of as much as \$500,000,000 through an unsalable surplus. Or, in any event, in maintaining a high level of price to our own people for a long period subsequent to freedom in the world's markets."

The proclamation fixes as reasonable guaranteed prices for No. 1 northern spring wheat and its equivalents at the principal primary markets New York, \$2.25; Philadelphia, \$2.30; Baltimore and Newport, \$2.35; Duluth, \$2.25; Minneapolis, \$2.25; Chicago, \$2.25; St. Louis, \$2.25; Kansas City and Omaha, \$2.15; New Orleans and Galveston, \$2.25; Tacoma, Seattle, Portland, Astoria, San Francisco and Los Angeles, \$2.25, and Salt Lake City, Great Falls, Poncha and Spokane, \$2.20.
